DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Stark et al. (6,520,648).

Stark et al. (6,520,648) discloses an image projection system comprising:

an arc lamp (112), which as noted in Column 5 Lines 40-50, is supplied with DC current;

a color filter (120) having red, blue, green and white segments.

As noted in Column 7 Lines 19-25, the current output to the lamp may be “pulsed” to a higher current during a particular color segment, such as the white segment.

As noted in Column 8 Lines 15-20, other color segments can also be pulsed with increased color if desired.

Allowable Subject Matter

3. Claims 7, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
